

SEBRIGHT SERVICE WIZARD

Introducing the First Real Innovation in Compactor Service Diagnostics

Benefits

- ★ Dramatically reduce's diagnostic time!
- ★ Helps eliminate trips to site by accurately identifying parts needed **BEFORE** the call!
- ★ Allows for easy communication by lay personnel.
- ★ Eliminates the need for troublesome pressure switches.

Exclusively by:
Sebright Products, Inc.
patent pending

Our revolutionary new diagnostic system offers an automatic system shut down to prevent costly damage to the compactor when a problem in the system is detected.

The easy to read display actually *tells you why* the shut down occurred. The remote pendant full light also becomes “service required” detection light, by blinking a specific number of consecutive flashes. It will allow the service provider to know which condition below exists:

- * Overloads tripped
- * Lost system pressure (blown hose detection)
- * Jammed ram - extend
- * Jammed ram - retract
- * Hauler station key in off position
- * Safety interlock switch not engaged
- * Transducer failure
- * Ram timing exceeded
