

AIRPORT COMPACTON SYSTEM

Manufactured and Installed by Sebright Products, Inc.

The above photo features a Model 8260-S-2-6 Compactor with right hand side load hopper, and Model HP-3000 hydraulic Cart Dumper

Features and Benefits to the End User

1. Limiting truck traffic on your property, and thereby reducing transportation frequency by applying over 100,000 lbs of compaction force to your waste, trash or recyclable material, allows you to "GO GREEN", as less fossil fuel will be required to service your account. You see lower transportation costs, and the environment wins with cleaner air, and less noise; fewer numbers of heavy trucks on your asphalt will result in far less wear and tear.
2. Hydraulic cart dumpers are ergonomically friendly and protect employees from potential back injuries. By using a cart dumper, loading trash is more efficient and much safer for your personnel.
3. With a maximum compaction force of 113,100 lbs, very high material densification is achieved, allowing you to achieve a strong return on investment. Reducing waste volume through superior compaction performance saves you money, and immediately improves your bottom line.

Through-the-Wall/Fence installation, eliminates the need for Security Clearance; the Waste Hauler can switch-out containers from outside the fence area.

The Towable Steel Waste Carts have a low loading height, due to fold-down side gate. With special 16" diameter extra heavy duty solid pneumatic rubber wheels, tapered bearings and a hinged lid that opens when the cart is in the dump position, you have a 5th wheel steel trailer of a very practical and rugged design.
