

**MOBILE ONSITE
DEMONSTRATION UNIT**

XTRACTOR

Clean, Controlled, Contained, Liquid/Solid Separation

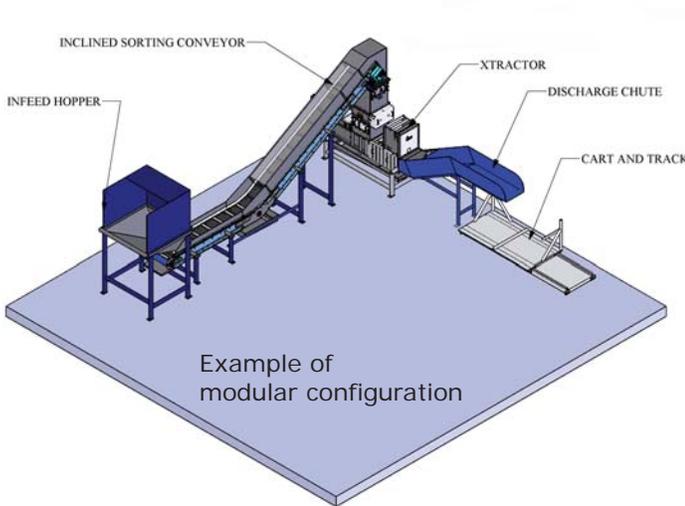

Here's What We Can Provide:

Our Demo Unit is a full size production machine, mounted on a 20 ft. 5th Wheel Trailer with its own power source.

We can arrange to have this unit at ***Your Site*** to run ***Your Product***, at ***Your Convenience***.

For Your On-site Demo, the following is required:

- 💧 Level surface for demo unit (warm site required)
- 💧 2 Pallets of material to be tested
- 💧 A place for disposal of tested materials
- 💧 Warm water washdown area for the demo unit upon completion

A Xtractor system can be designed with a hydraulic dumper, conveyor or manual loading.

Once void of liquid, packaging material is densified for easy handling and recycling & disposal.

Documented 1,000,000 lbs. of dry material output annually.

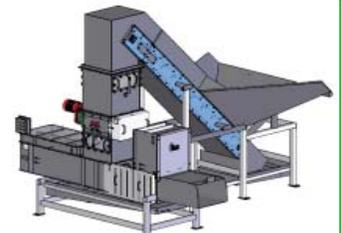

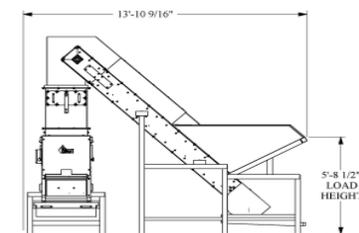

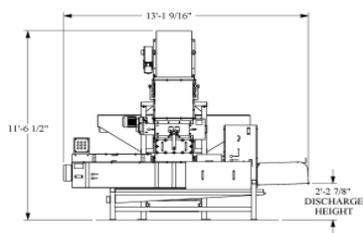

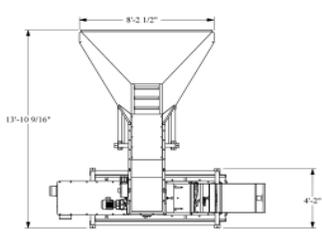

Guaranteed performance & Proven reliability.

Stainless Steel Construction

Hand loading of the demo unit represents the quality of de-packaging, not intended to duplicate production thru-puts
